HAYT FARMSTEAD, Garage

HABS NO. NY-6300-K

HABS
NY,
40-PA
2-K-

- Location: Route 311, Patterson, Putnam County, New York
- Significance: This building, apparently constructed to house agricultural machinery as well as automobiles, is a contributing structure to the character of the Hayt Farmstead.
- Description: The garage is of nailed braced frame construction with vertical plank siding and low stone and concrete foundation around the north, west and south sides. The structure has four bays, each opening to the east. The southern two have earth floors; the other two, concrete. The northernmost bay is separated from the others by a partition wall, and has a sliding door. The three remaining bays have no doors, but are delineated by square posts set on poured concrete footings. The composition shingled side-gable roof has an extended rear slope, for a "saltbox" effect, and exposed rafter ends.
- History: The date of this structure is unknown, but it probably was built in the early decades of the 20th century.
- Sources: See Narrative Overview.
- Architectural Historian: M.H. Bowers, Louis Berger & Associates, Inc., February 1989.
